DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 11-13 are rejected under 35 U.S.C. 102(a) as being anticipated by Godek [5321380].

Godek discloses a core of magnetic material of two parts 40, 42 having arms projecting from the bases; inductor winding 32 supported by plate 12 having first side 14 and second side 16 and opening 33 in which arm is inserted wherein the first and second bases are perpendicular to direction of said arm and parallel to the plate[see figure 4; col 4, lines 7-31].

Allowable Subject Matter

3. Claims 14-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is an examiner's statement of reasons for allowance:

Claim 14 recites, inter alia, *first and second bases each have the general shape of a V with two branches connected by connecting part, said arm connecting two bases at respective connecting parts so that these two bases have the general shape of an X.*

The references of record do not teach or suggest the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.
